

AWARD WINNING FIRST AID TRAINING

Giving you the confidence to help save life

Course Profile

CPR & AED Course with Defibrillator training

Duration

2-3 Hours

Description

Sudden cardiac arrest can happen to anyone at any time. survival is dramatically reduced without early intervention and defibrillation.

The risk of death can be reduced if you have a defibrillator in your workplace and know how to use it. Devices are becoming more and more readily available.

Every second matters and this course will give you the confidence to act quickly and effectively. Most importantly, the course will also teach defibrillator operators how to perform effective CPR

Objectives

On completion of the course, delegates will be able to recognise and deal with:

- +The principles of First Aid
- + Legalities
- + Emergency Management Procedures.
- + Unconscious casualties
- + Recognising AED machines
- + Using an AED device
- + Anaphylaxis & Epi Pen Use
- + CPR

Group discounts available if booked with other First Aid courses.
